Running a light show, but don't want to leave your lighting desk on site ?

The **DMXStreamer** is amongst the most valuable DMX512 tool you will find. This product records any DMX512 stream for up to 2 days. You simply play your lighting sequence and record it with the **DMXStreamer**. You can then play it back when you need it, or automatically based on time of day with the inbuilt real time clock.

This unit is great for any architectural work thanks to the inbuilt clock and scheduling features or simply backing up a lighting control system in case problems occur. The automatic backup will start a predefined show if there is loss of DMX signal.

The **DMXStreamer** can now be used with the **Compact Flash Expansion Module** that allows you to save shows and setup information onto a standard Compact Flash card up to 2GBytes in capacity.

Applications:

- LIVE DMX Show recording
- Complex DMX Show recording
- Light desk backup
- Architectural lighting
 - Theme parks
